

Link Manager

Link Manager Protocol (LMP)

The Link Manager Version parameter

Parameter name	Assigned values	
VersNr	0	<i>Bluetooth</i> Core Specification 1.0b
	1	<i>Bluetooth</i> Core Specification 1.1
	2	<i>Bluetooth</i> Core Specification 1.2
	3	<i>Bluetooth</i> Core Specification 2.0 + EDR
	4	<i>Bluetooth</i> Core Specification 2.1 + EDR
	5	<i>Bluetooth</i> Core Specification 3.0 + HS
	6-255	(reserved)

Table 1: The LMP Version Parameter Values

The LMP_CompId parameter codes

This is the parameter used in the LMP Version procedure. All companies that create a unique implementation of the Link Manager shall have their own LMP_COMPID.

The table previously given in this section is now combined with the TCS company identifier table, see the [Company Identifiers table](#)
