Overview - Assigned Numbers

The Assigned Numbers are a living document that lists assigned numbers, codes and identifiers in the *Bluetooth* wireless standard. Assigned numbers include:

- BD_ADDR values assigned by the IEEE - to obtain a block of BDADDRs please goto http://standards.ieee.org/regauth/oui/

- LMP_CompID, TCS Company ID and Device/Vendor ID values are assigned by the *Bluetooth Specification Program Manager*. When requesting values, please answer the following questions:

    1. Company information (legal name of company, address, phone, fax).
    2. Name of Company's primary contact (name, phone, fax, email, company url and postal address).
    3. A statement that the company is a current Bluetooth SIG member in good standing.
    4. A statement that the company is developing a unique implementation of LM protocol (or TCS).
    5. Brief Description of your company and the implementation you are seeking company ID for.
    6. Please indicate whether you are requesting LMP_CompID, TCS Company ID or Device/Vendor ID. To see a complete listing of all LMP_CompID, TCS Company IDs or Device/Vendor ID, please refer to the Company Identifiers.

- Other number requests will be reviewed by the Architecture group; please send requests to the BARB chair with requestor, company and contact information.
