ITU-T Recommendation E.111

(Extract from the *Blue Book*)

NOTES

1 ITU-T Recommendation E.111 was published in Fascicle II.2 of the *Blue Book*. This file is an extract from the *Blue Book*. While the presentation and layout of the text might be slightly different from the *Blue Book* version, the contents of the file are identical to the *Blue Book* version and copyright conditions remain unchanged (see below).

2 In this Recommendation, the expression “Administration” is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Recommendation E.111

EXTENSION OF INTERNATIONAL TELEPHONE SERVICES

Application of that provision of the *Telephone Regulations* [1] which states that Administrations shall endeavour to extend international telephone services to the whole of their territories might sometimes entail the establishment of calls leaving something to be desired from the point of view of transmission quality. It is therefore desirable:

- 1) to take no decision to create or extend a new relation unless such means are available as would provide satisfactory service;
- 2) to make the opening or extension of the relation dependent on the passing of satisfactory test calls.
