SPECIFICATIONS OF SIGNALLING SYSTEM No. 4

SWITCHING TO THE SPEECH POSITION

ITU-T Recommendation Q.128

(Extract from the *Blue Book*)

NOTES

1 ITU-T Recommendation Q.128 was published in Fascicle VI.2 of the *Blue Book*. This file is an extract from the *Blue Book*. While the presentation and layout of the text might be slightly different from the *Blue Book* version, the contents of the file are identical to the *Blue Book* version and copyright conditions remain unchanged (see below).

2 In this Recommendation, the expression “Administration” is used for conciseness to indicate both a telecommunication administration and a recognized operating agency.

Recommendation Q.128

4.5 SWITCHING TO THE SPEECH POSITION

4.5.1 *Outgoing international exchange*

The circuit shall be switched to the speech position when the outgoing register release (see Recommendation Q.127, § 4.4.1).

4.5.2 *International transit exchange*

The circuit shall be switched to the speech position immediately after the transit register has sent the seizing signal (see Recommendation Q.127, § 4.4.2).

4.5.3 *Incoming international exchange*

The circuit shall be switched to the speech condition immediately the incoming register:

- has sent back the number-received signal and sent forward the numerical information to the national network equipment;
- or has sent back the busy flash-signal;

or, if these signals are not sent, when the register releases under abnormal conditions (see Recommendation Q.127, § 4.4.3 (2)).
