[Utah MEP](#)

Comment #	Submitted By (Name/Org):*	Type (General / Editorial / Technical)	Source (publication, analysis, overlay)	Starting Page # *	Starting Line #*	Comment (include rationale)*	Suggested Change*
1	Bryant Vasquez/ Utah MEP	Tchnical		14	469	It talks about "container-based encryption"	It will be good fo the SMBs to have a defenition for container-based encryption
2	Bryant Vasquez/ Utah MEP	Tchnical		50	1822	In this control there is an ODP ["organization-defined types of cryptography]" This helps SMBs to implement cryptography and the challenge to implement FIPS	You can imply that FIPS is optional, but it is not clear. Somehow make it clear whether or not FIPS Validated is a must/optional in nonfederal organizations. Or add a reference to keep it straight forward. Or make clear in NIST SP 80-171 A.
