Summary of changes. We:

- Added a link to our website and a reference.

- Clarified the leakage-resistance vs. leakage-resistance terminology.

- Clarified the fact that the L-box applies to $2l$ bits already in Algorithms 1 and 2.

- Added figures describing Clyde-128 and Shadow-512 and their components.

- Fixed a few minor typos of the original submission.

- Provide a minor update of the reference implementations.

As required, the specifications are unchanged.

Note that additional material (discussions, implementations, ...) are available on our website.
