

Documentation Roadmap and Forum Information

To navigate the documentation set, follow these guidelines:

- If you are new to the documentation set and new to Windows, we recommend that you read the overview documents in this order:
 1. [\[MS-DOCO\]](#), "Windows Protocols Documentation Roadmap" for a description of the objectives, audience, organization, and conventions used in the documentation set.
 2. [\[MS-SECO\]](#), "Windows Security Overview" for an overview of the Windows security model and foundational security concepts.
 3. [\[MS-SYS\]](#), "Windows Protocols Documentation Roadmap" for an overview of the collections of licensed protocols under the WSPP program.
 4. The individual technical documents (TDs) you are interested in after you have read the documents listed above.
- If you are familiar with the documentation set and Windows, go directly to the TDs in which you are interested.

Forum information is available at the following locations:

Open Specifications	Participate in the top-level forum group.	http://go.microsoft.com/fwlink/?LinkId=111125
Using the Open Specifications	Ask questions about the Open Specifications documents, their organization, language conventions, and references.	http://go.microsoft.com/fwlink/?LinkId=111122
Windows Protocols	Discuss technical content and implementation of the Windows protocols described in the Open Specifications.	http://go.microsoft.com/fwlink/?LinkId=111123
File Services	Discuss technical content and implementation of Server Message Block (SMB) protocols described in the Open Specifications.	http://go.microsoft.com/fwlink/?LinkId=111124
